SUMMARY

Principal Engineer and Team Lead with 7+ years of hands-on experience in full-stack development. I turn business problems into clean, scalable digital solutions and stay involved through the whole journey: requirements, architecture, build, launch, and ongoing improvement. I have led development teams, mentored junior developers, and delivered 72+ projects for clients in different industries, from startups to established businesses. My current focus is SaaS products, AI-driven automation, and system architecture.

7+ years of experience · **72+** projects delivered · **26+** happy clients · **4** industry awards

EXPERIENCE

Senior Software Engineer & Tech Lead

Nov 2025 to Present

Self Employed · Lahore, Hybrid

Leading engineering teams and delivering scalable digital solutions for clients across various industries.

- Focus on full-stack development, AI-driven automation, and system architecture
- Helping businesses modernize their workflows and reduce operational costs
- Building products that grow with the business

Stack: Full-Stack Development, AI Automation, System Architecture, Team Leadership

Senior Software Engineer

Jun 2023 to Oct 2025

ByteCrew · Full-time · Lahore, On-site

Experienced in RESTful APIs and full-stack development with Laravel, Vue.js, and Python.

- RESTful API and full-stack development with Laravel, Vue.js, and Python
- Integrated third-party services to enhance functionality, scalability, and performance

Stack: Laravel, Vue.js, Python, REST APIs

Software Engineer

May 2021 to Apr 2022

University of South Asia

Developed and maintained university management systems and student-facing portals serving 10,000+ students.

- Built a student management system handling 10,000+ records with real-time updates
- Created REST APIs used by the mobile app and the web platform
- Optimised database queries and reduced page load time by 35%

Stack: Laravel, Vue.js, MySQL, Git, REST APIs

Full-Stack Developer

Mar 2020 to Apr 2021

VU Software House

Built web applications from scratch for different clients, working through the full development lifecycle.

- Developed 10+ client websites and web applications, from concept to launch
- Integrated Stripe and JazzCash payment gateways for e-commerce platforms
- Turned Figma and XD designs into pixel-perfect working pages

Stack: PHP, Laravel, JavaScript, Bootstrap, MySQL, Git

SELECTED PROJECTS

AK Tailor App (tailor.aktechsol.pk): Multi-tenant SaaS for tailor shops: orders, measurements, payments, udhaar, subscriptions, and per-shop backup and restore. Laravel, MySQL.

AK Designer Art (akdesignerart.com): Online learning platform with course enrollments, installment plans, and CMS, student, instructor, and referral panels. Laravel, MySQL.

AK Tech Sol (aktechsol.pk): Agency website and business system: inquiry to proposal to project to invoice, with a full admin panel and multi-currency billing. Laravel, Tailwind CSS.

University of South Asia (usa.edu.pk): University platform serving 10,000+ students with course management, faculty profiles, news, events, and admissions. Laravel, JavaScript.

Inviggr: SaaS platform for social media scheduling, analytics, and team collaboration with multi-tenant architecture. Laravel, React.js, Redis.
