PROFESSIONAL SUMMARY

Principal Engineer and Team Lead with 7+ years of experience in full-stack development (Laravel, PHP, Vue.js, React, Python). I design and build scalable products that businesses run on every day: SaaS platforms, learning systems, and e-commerce stores, including a learning platform with 2,700+ students and a university platform serving 10,000+ students. I lead development teams, mentor junior developers, and stay involved through the whole journey, from requirements and architecture to launch and improvement. Current focus: SaaS product development, AI-driven automation, and system architecture.
